The Dashboard reflects available data about Rohingya refugees' victims of human trafficking that ATWG members have identified, referred, and assisted: 138 refugees identified between April and June 2023. Compared to the second quarter of 2023, the number of trafficking victims identified by the ATWG members has doubled. This increase is not indicative of a rise in human trafficking in the camps; rather, it reflects the intensified efforts in awareness-raising activities and specialized training for victim identification and screening. The data on this Dashboard is generated from information communicated by ATWG members and should not be interpreted as showing the extent of prevalence of human trafficking in the camps. These statistics may be subject to change.

66% of identified victims are male and 34% female

## Number of Identified Victims by Month

59 — April
32 — May
47 — June

Type of Exploitation

● Female ● Male

- Trafficking (Forced labor): 26 / 83
