PROTECTION SECTOR
COX'S BAZAR, BANGLADESH

Joint Protection Monitoring

Factsheet | 30 September 2024

Context

The Joint Protection Monitoring (JPM) framework has been implemented by the Protection Sector since January 2022 to promote the systematic and regular collection, triangulation, and analysis of protection incidents and risks faced by Rohingya refugees in Cox's Bazar camps. The **Joint Protection Monitoring reports** provide a comprehensive understanding of the protection situation in the camps by offering periodic insights into protection incidents, risks, threats, and vulnerabilities. This joint monitoring approach ensures that the evolving protection landscape is analyzed in a consistent and coordinated manner. **Six partners**—UNHCR, IOM, IRC, DRC, Oxfam, and HI—conduct protection monitoring as a core part of their protection programs, covering all 33 camps. The report also reflects contributions from the **Child Protection (CP) and Gender-Based Violence (GBV) Sub-Sectors**, as well as the **Anti-Trafficking Working Group**, **Gender-Diverse Population Working Group**, and the **Housing, Land, and Property (HLP) Technical Advisor**. These collaborative efforts ensure a holistic analysis of the protection challenges faced by the Rohingya population in Cox's Bazar.

	in September	(Jan - Sep 2024)	(Jan - Dec 2023)
# of Incidents reported:	139	1,233	1,830
# of refugees affected by incidents:	144	2,591	3,954

The Protection Sector led Joint Protection Monitoring (JPM) reported a total of 139 incidents in Cox's Bazar Rohingya Refugee Camps affecting 144 refugees during the month of September 2024.

The most common types of incidents were abduction/kidnapping (48 incidents), followed by gunshots (35 incidents), serious physical assault (24 incidents), extortion (17 incidents), recruitment (9 incidents), and killing/murder/manslaughter (6 incidents).

Organized groups were identified as the main perpetrators, responsible for 68% of these incidents.

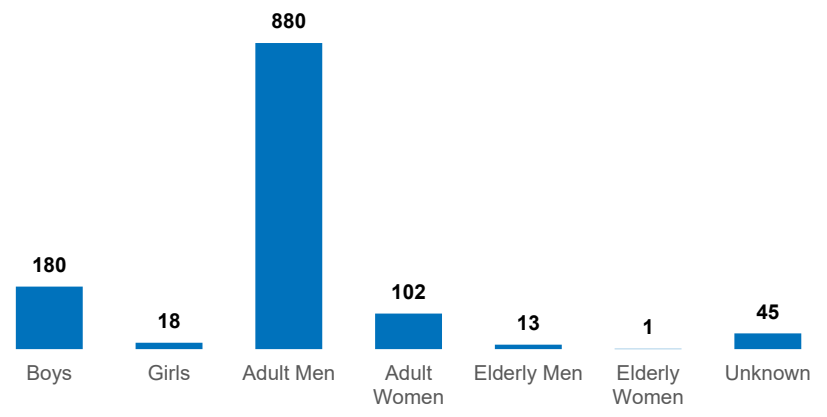
Age and gender - Jan - Sep 2024



*Please note that some incidnets lack full identification regarding the age or gender of the individuals involved. As such, these details remain unclear and may be subject to further updates once more information is available.

*Please note that data verification may take longer due to the complexities on the ground, and as a result, the reported figures are subject to adjustments in future updates. This is to ensure the accuracy of the information after thorough verification by partners.
