

Nutrition Sector Meeting

IM Update

As of June 2026

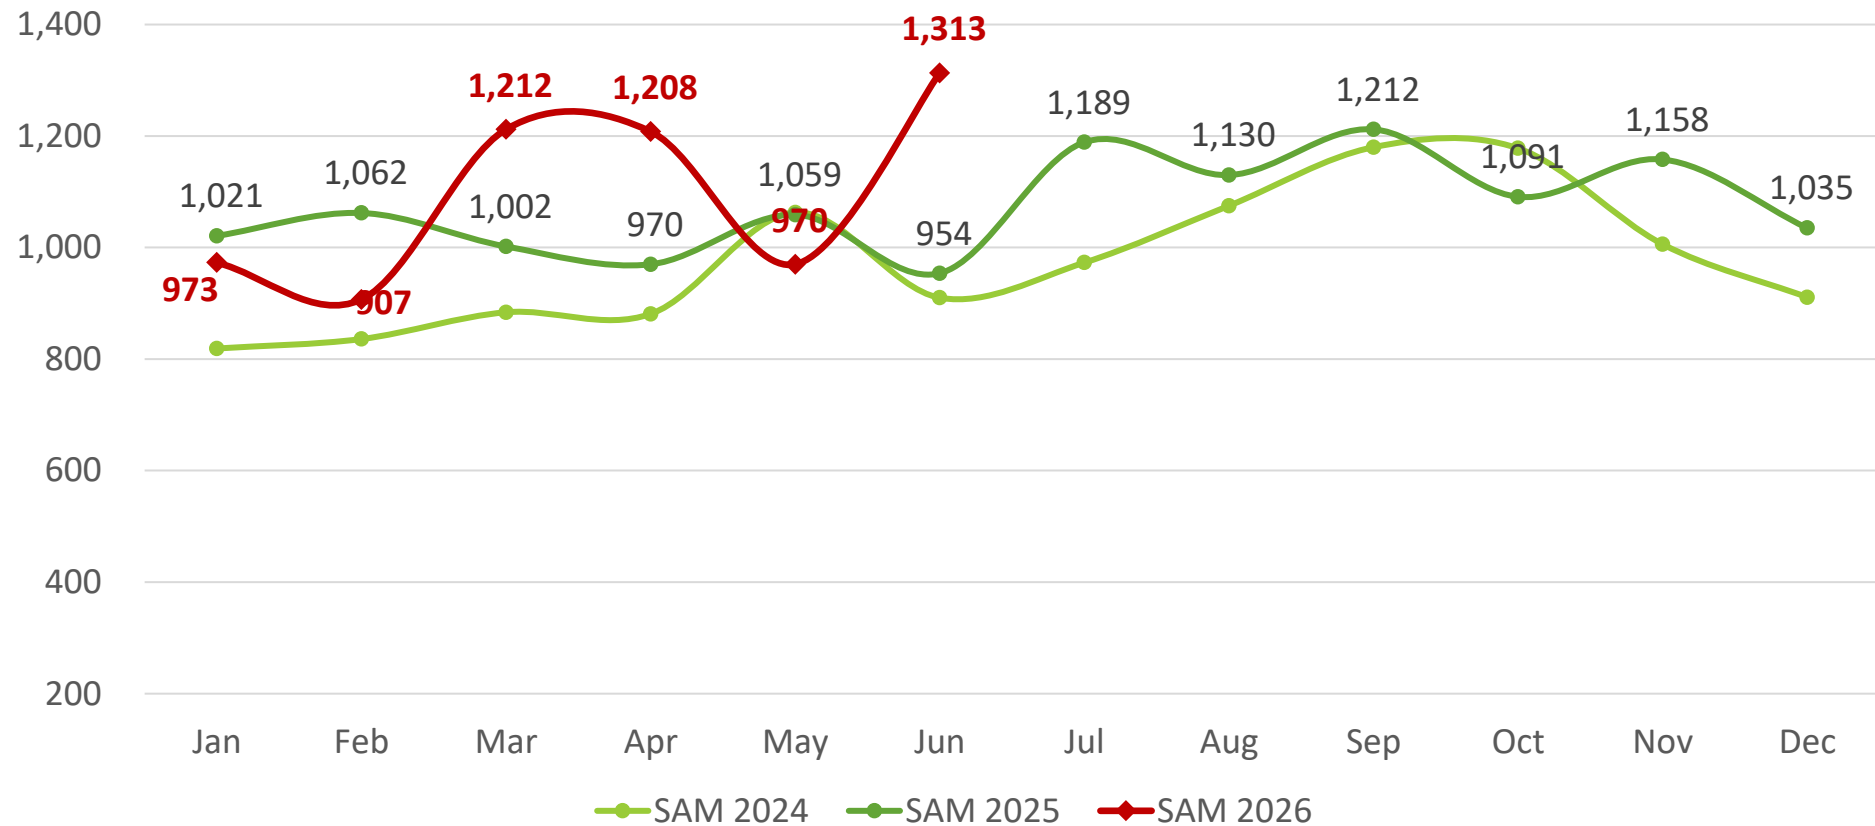

Presented by: Shatabdy Das, Information Management Assistant and
Md. Lalan Miah, Information Management Officer, UNICEF

SAM Admission Progress and Trend 2024 to 2026 (Jan-Jun)

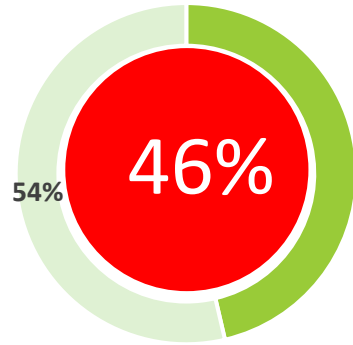

Yet to reach

**6,583 Reached out of
14,500 Targeted**

Despite low pick in admission at the beginning of 2026, overall admissions increased by 8% in 2026 among children 6-59 months compared to the same period in 2025

SAM SC Admission Progress and Trend 2024 to 2026 (Jan-Jun)

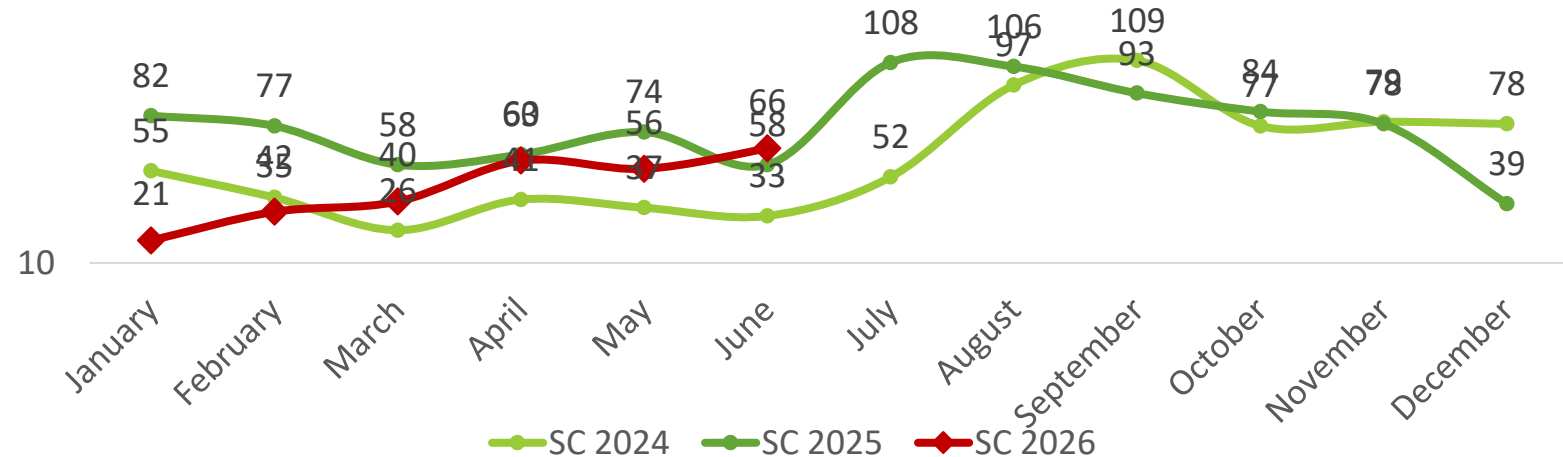

Yet to reach

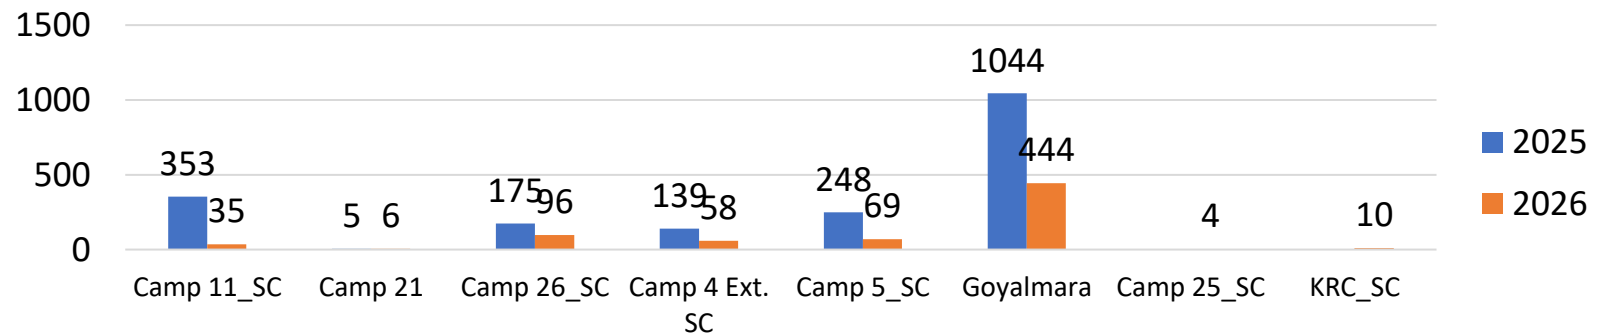

649 Reached (HS-278, MSF-371) out 1,400 Targeted

SAM inpatient admission trends in SCs run by HS Partners **decreased by 33%** in 2026 among children 6-59 months compared to 2025

SAM SC Admission Trends over time (Excluding MSF data)

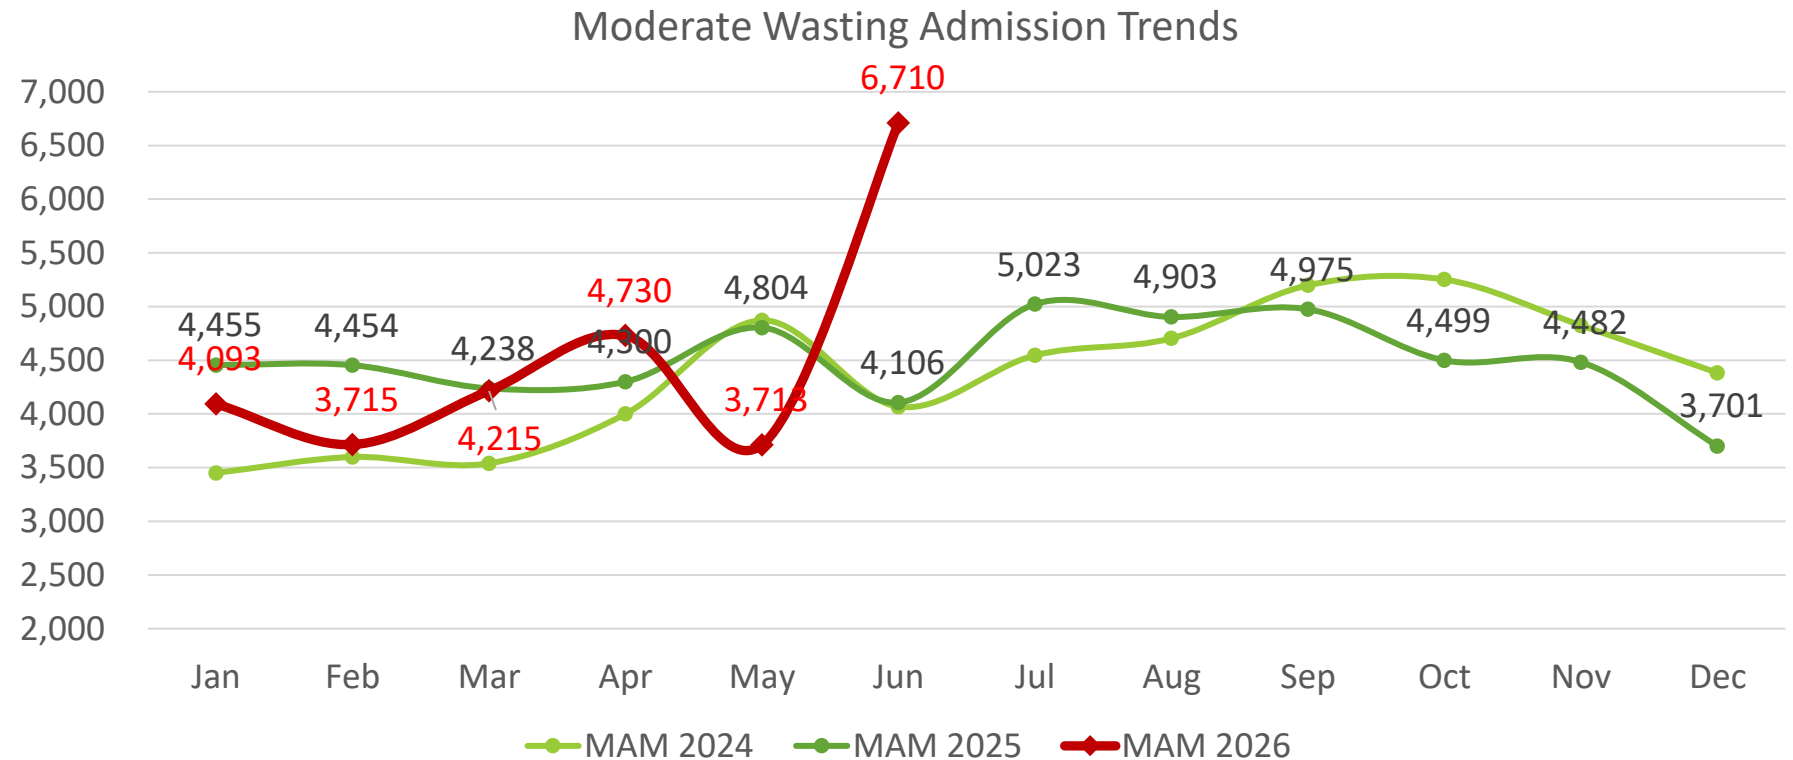

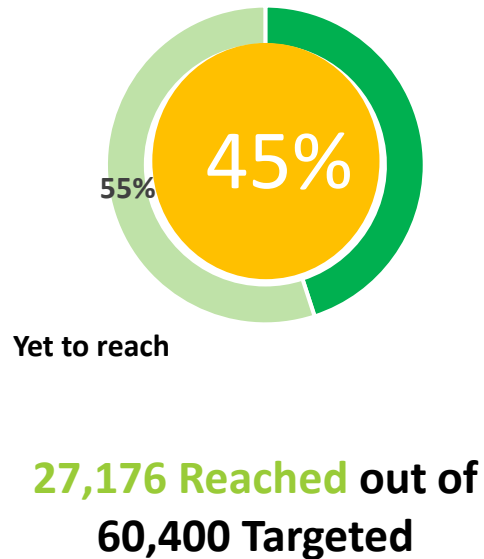

SC Admission by Facility: 2025 vs 2026

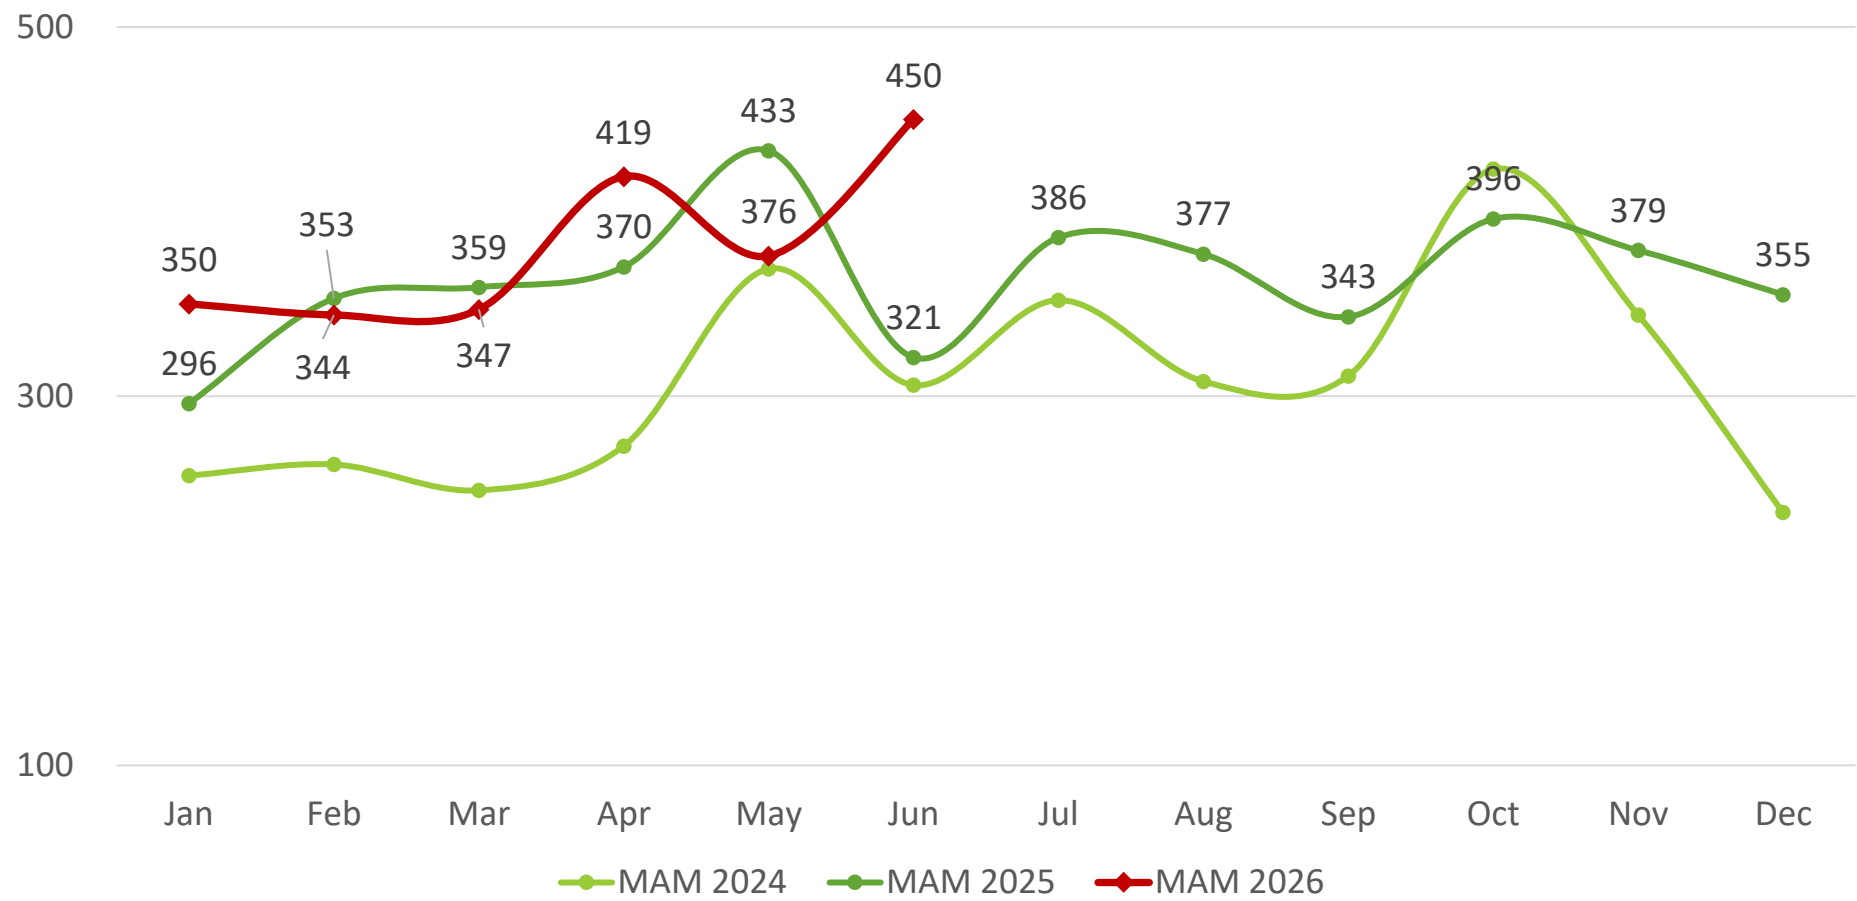

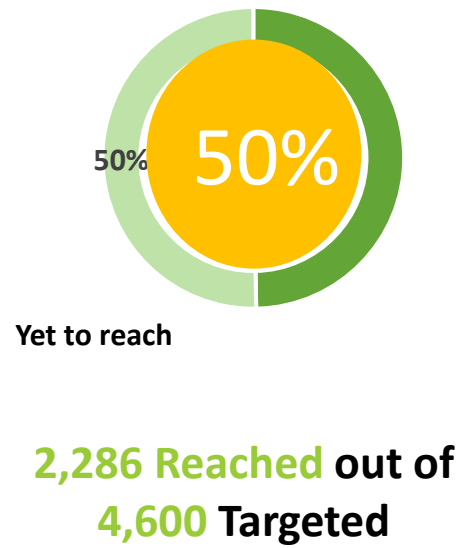

IRC- Camp 11; SCI- camp 21; Friendship=26, K- 4Ext; RTMI-camp 5;

MAM CU5 Admission Progress and Trend 2024 to 2026 (Jan-Jun)

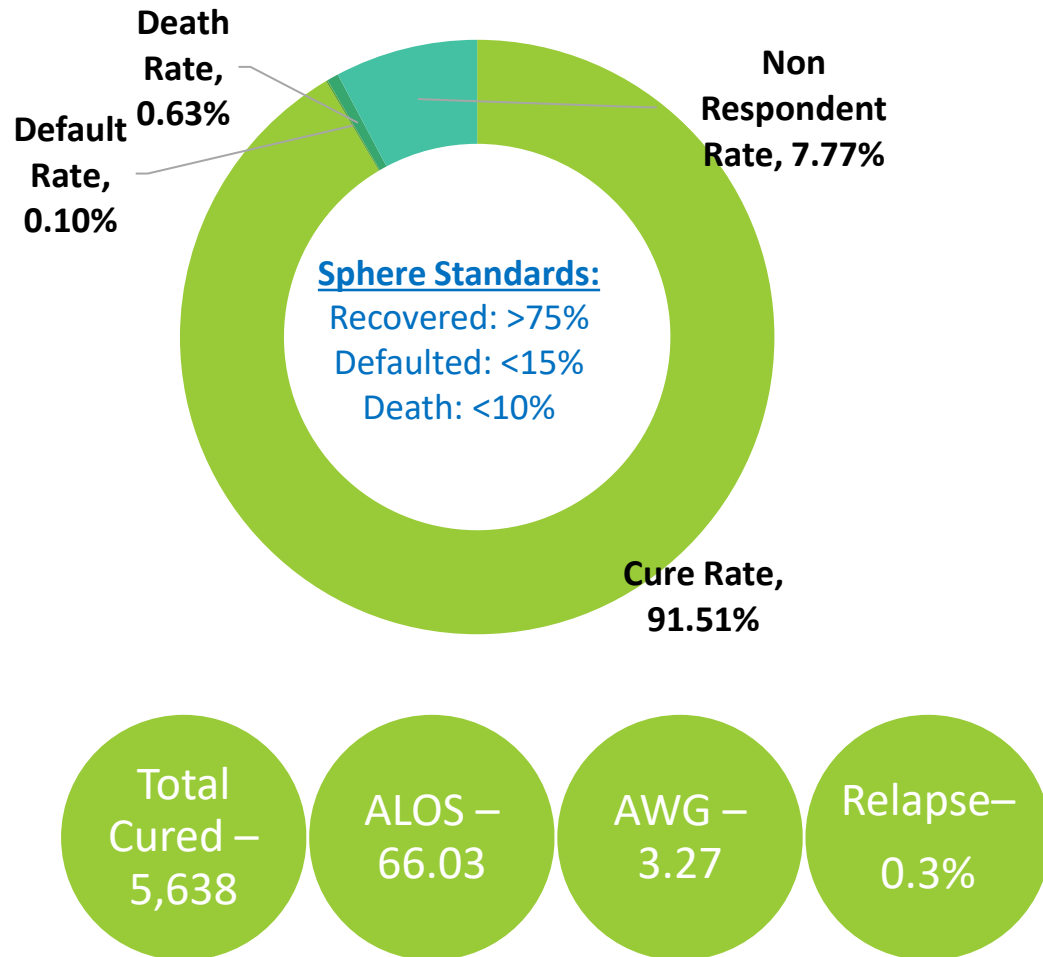

- **MAM admission trends increased by 3% in 2026 among children 6-59 months** compared to the same period in 2025.
- Due to starting of BSFP for over 2 children (36-59 month), more children are coming to the INFs which enabling full screening and the identification of previously undetected MAM cases.

MAM PBW Admission Progress and Trend 2024 to 2026 (Jan-Jun)

MAM PBW admission trends **increased by 7% in 2026** compared to 2025.

SAM KPI Analysis: Jan-Jun 2026

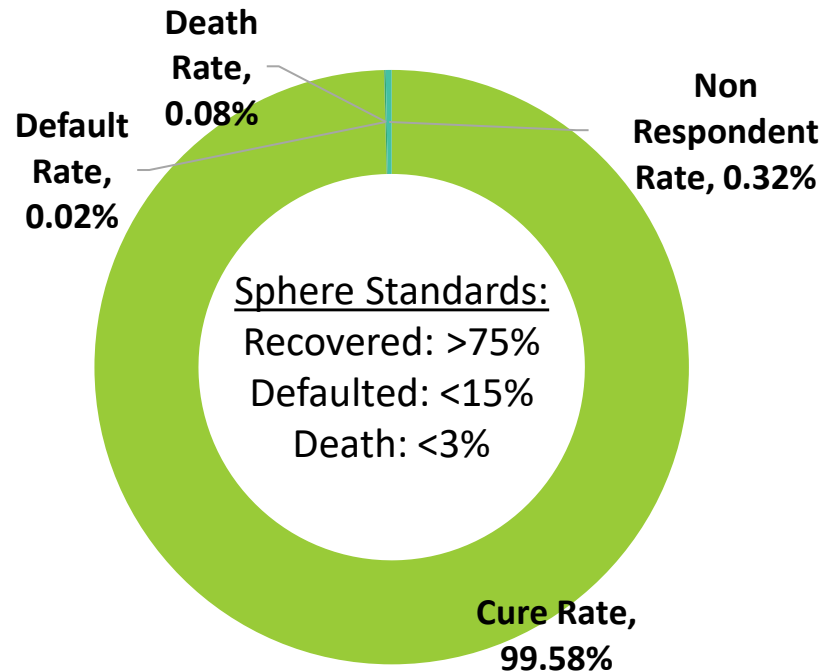

- ✓ A **high cure rate** and **very low death and default rates** indicate a **high-quality SAM management program**.
- ✓ The **non-respondent rate** is notable—it shows some children didn't improve despite treatment, which may require further investigation (e.g., underlying illnesses, late admission, or poor treatment adherence).
- ✓ **ALOS of 66 days which is common here in Rohingya response** but also indicates a bit of higher days under therapeutic programme (typically 30 to 40 days in SPHERE Handbook Standard 2000 & 2004)
- ✓ Average weight gain is on **acceptable range** based on the contextualized data driven guideline developed by CMAM TWG this year.
- ✓ Relapse rate of 0.3% reflects a **highly effective program and strong post-discharge monitoring**. In fact, when relapse rates dip below 2%, such rates are considered **exceptional** and represent high-quality, sustainable SAM treatment outcomes.

Adapted Threshold
for CXB

Average weight Gain (g/kg/day)	Category
≥4.0	Excellent
3.5 to <4.0	Good
3.0 to <3.5	Acceptable
2.5 to <3.0	Poor
<2.5	Very poor

MAM KPI Analysis: Jan-Jun 2026

- ✓ A high cure rate and very low death, default and non-respondent rates indicate a high-quality MAM management program (TSFP).
- ✓ ALOS of 62.46 days.
- ✓ We have observed 85.75; 71.46; and 65.53, 63.7 respectively in 2022; 2023; 2024; 2025.
- ✓ Relapse rate of 0.2% reflects a highly effective program and strong post-discharge monitoring.
