

# Nutrition Sector Meeting

## *IM Update*

As of July 2026

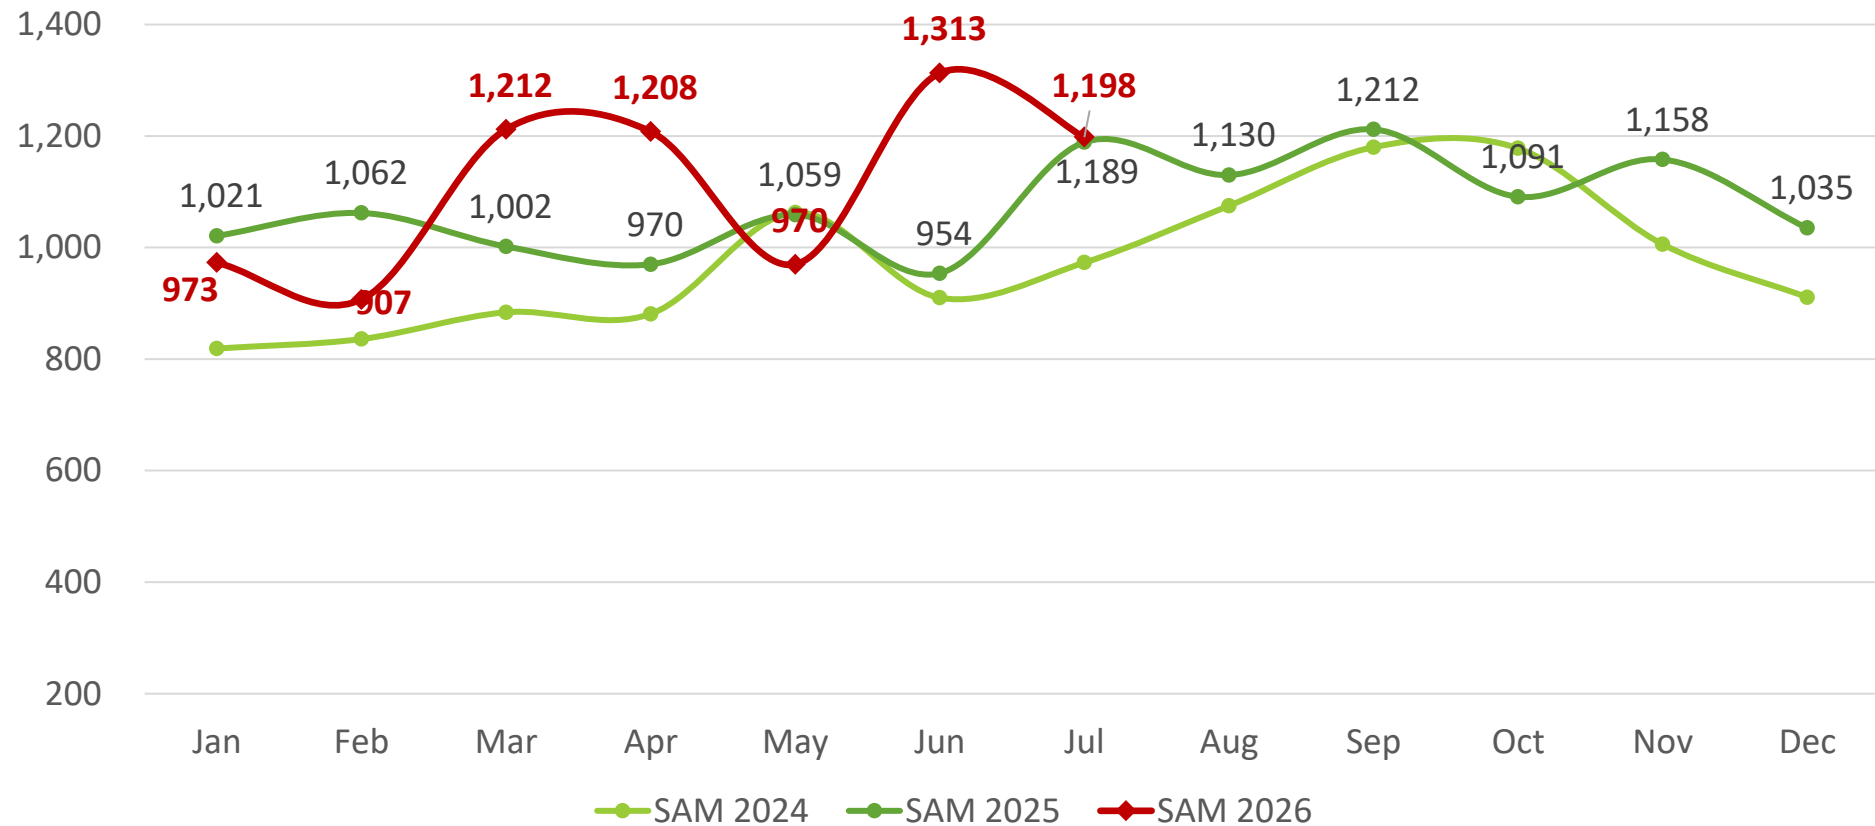

Presented by: Shatabdy Das, Information Management Assistant and  
Md. Lalan Miah, Information Management Officer, UNICEF

# SAM Admission Progress and Trend 2024 to 2026 (Jan-Jul)

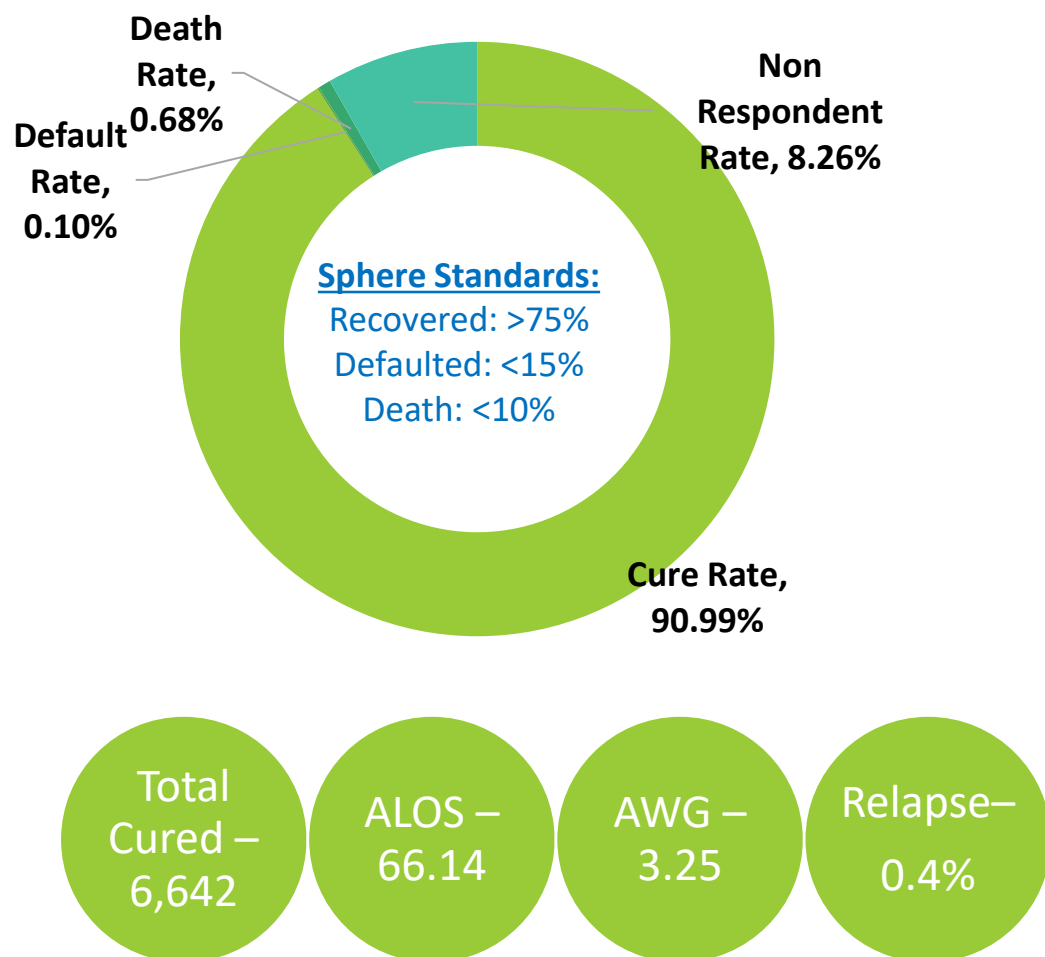

Yet to reach

**7,781 Reached out of  
14,500 Targeted**

**Despite low pick in admission at the beginning of 2026, overall admissions increased by 7% in 2026 among children 6-59 months compared to the same period in 2025**

# SAM KPI Analysis: Jan-Jul 2026

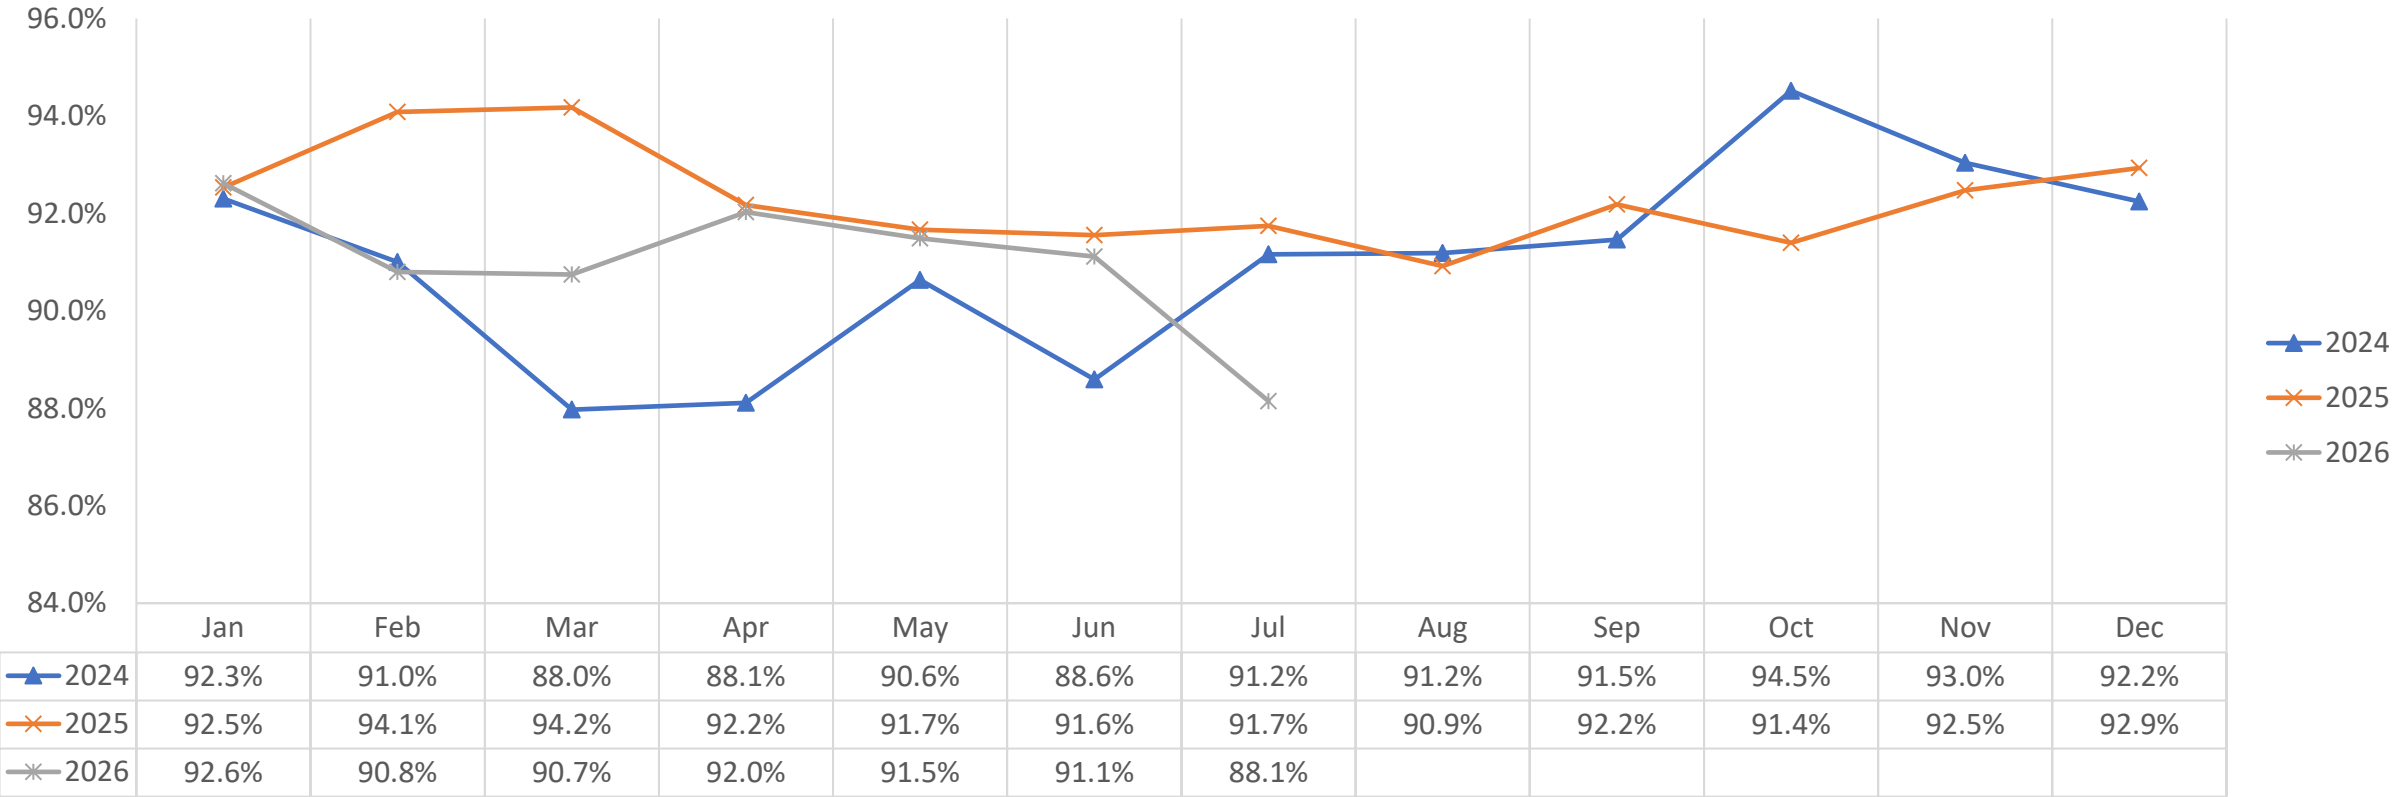

- ✓ A **high cure rate** and **very low death and default rates** indicate a **high-quality SAM management program**.
- ✓ The **non-respondent rate** is notable—it shows some children didn't improve despite treatment, which may require further investigation (e.g., underlying illnesses, late admission, or poor treatment adherence).
- ✓ **ALOS of 66 days which is common here in Rohingya response** but also indicates a bit of higher days under therapeutic programme (typically 30 to 40 days in SPHERE Handbook Standard 2000 & 2004)
- ✓ Average weight gain is on **acceptable range** based on the contextualized data driven guideline developed by CMAM TWG this year.
- ✓ Relapse rate of 0.4% reflects a **highly effective program and strong post-discharge monitoring**. In fact, when relapse rates dip below 2%, such rates are considered **exceptional** and represent high-quality, sustainable SAM treatment outcomes.

Adapted Threshold  
for CXB

| Average weight Gain<br>(g/kg/day) | Category   |
|-----------------------------------|------------|
| ≥4.0                              | Excellent  |
| 3.5 to <4.0                       | Good       |
| 3.0 to <3.5                       | Acceptable |
| 2.5 to <3.0                       | Poor       |
| <2.5                              | Very poor  |

# SAM KPI Analysis: Cured Rate

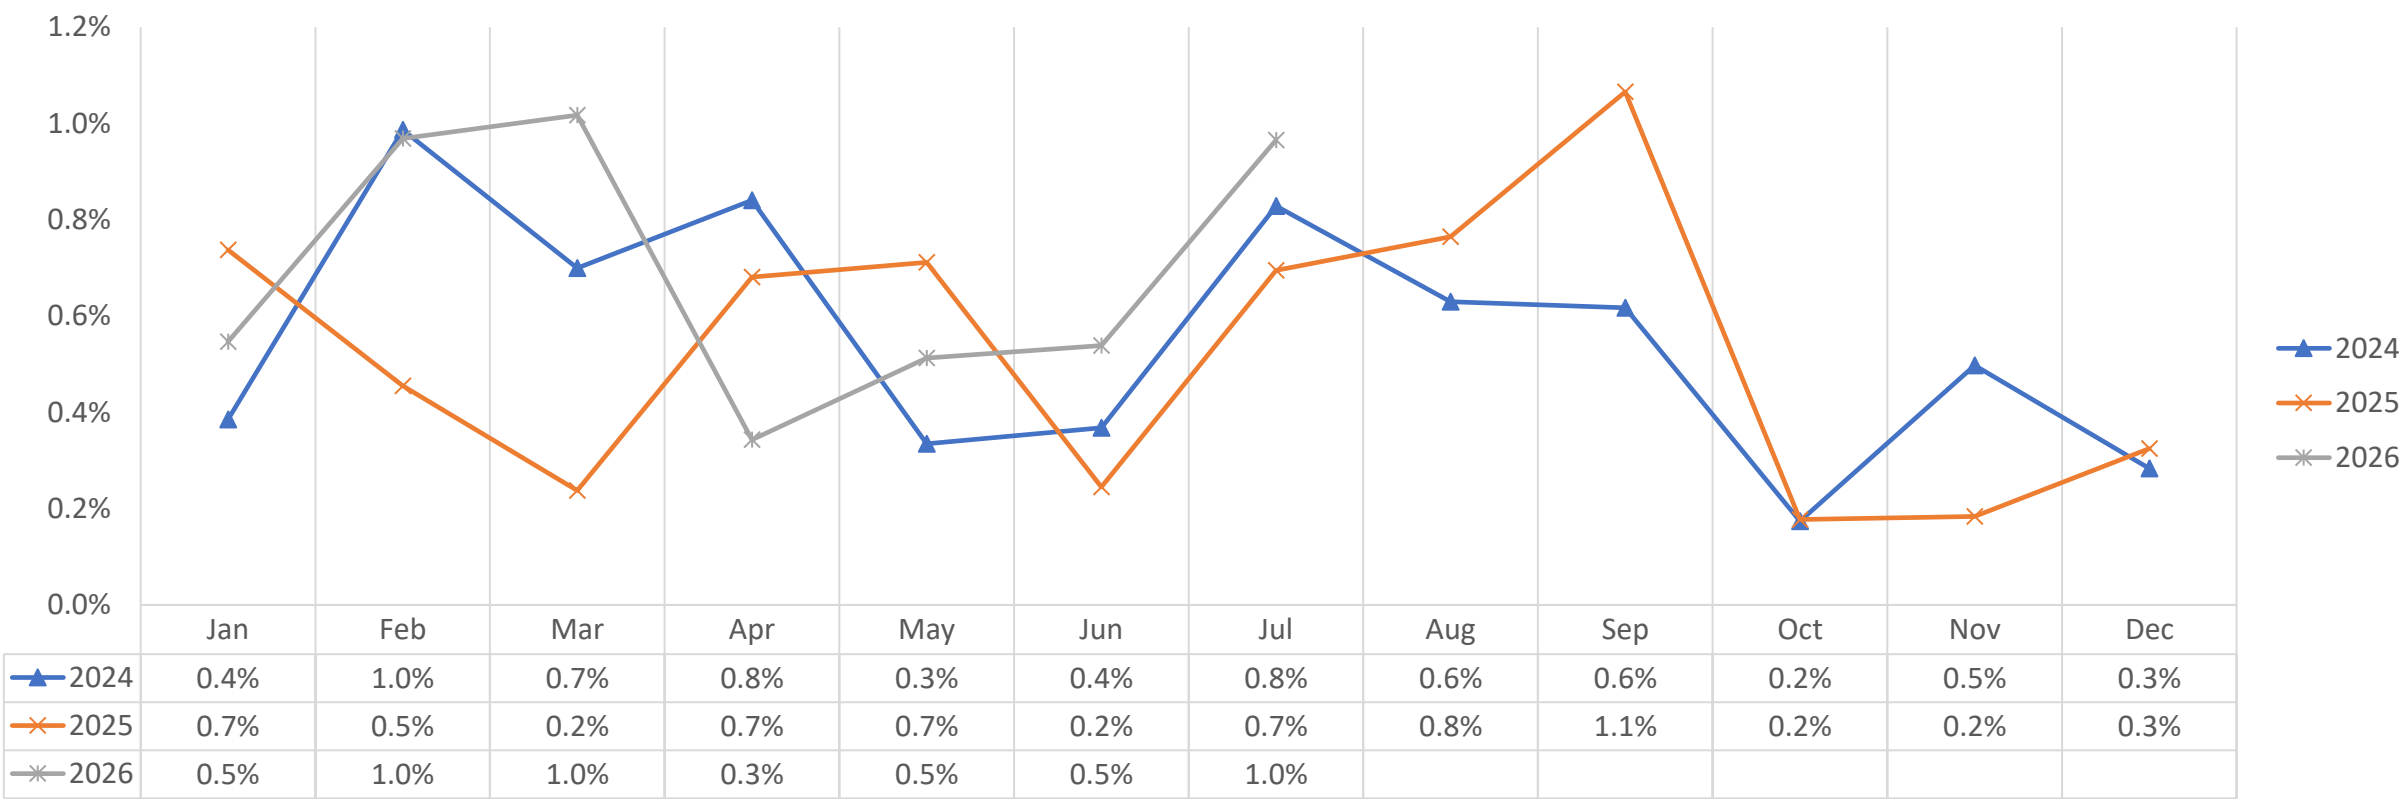

TRENDS OF SAM CURE RATE FOR CHILDREN 6-59M

**Sphere Standards:**  
Recovered: >75%

Medical Transfer: <15%

# MAM CU5 Admission Progress and Trend 2024 to 2026 (Jan-Jul)

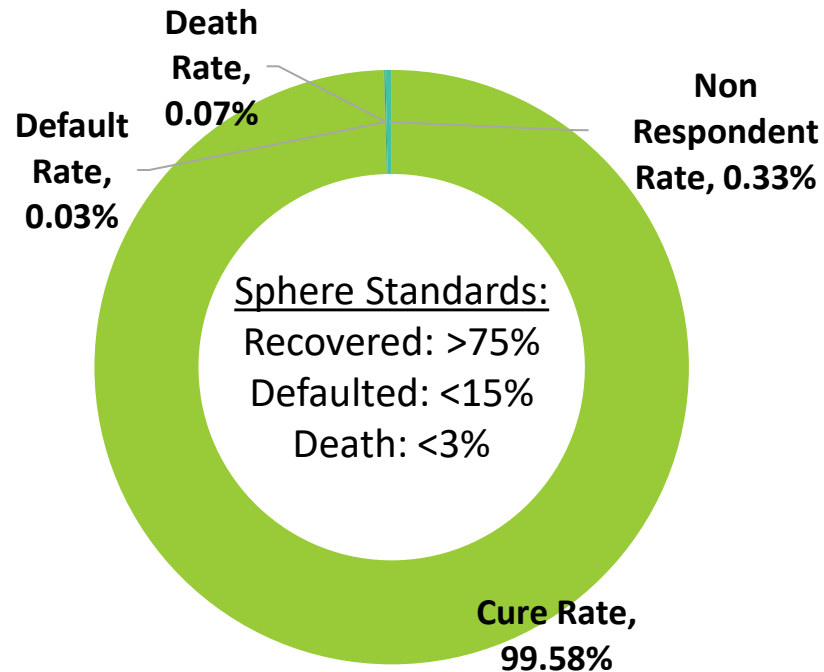

- **MAM admission trends increased by 4% in 2026** among children 6-59 months compared to the same period in 2025.

# MAM PBW Admission Progress and Trend 2024 to 2026 (Jan-Jul)

**MAM PBW admission trends increased by 10% in 2026** compared to 2025 (Jan-Jul).

# MAM KPI Analysis: Jan-Jul 2026

- ✓ A high cure rate and very low death, default and non-respondent rates indicate a high-quality MAM management program (TSFP).
- ✓ ALOS of 61.72 days.
- ✓ We have observed 85.75; 71.46; and 65.53, 63.7 respectively in 2022; 2023; 2024; 2025.
- ✓ Relapse rate of 0.33% reflects a highly effective program and strong post-discharge monitoring.
